Snipers at War John Walter 2017-05-30 Snipers at War is a detailed history and analysis of the equipment,

tactics and personalities of the 'sniping world', from the pursuit of accuracy to the latest electronic aids to observation and ranging. Technology and marksmanship from the Crimean War to the present day is examined in detail. The role of the sniper was largely ignored until the Winter War of 1939-40 between Finland and the USSR showed what could be achieved by specialist marksmen: Finn Simo Häyhä amassed 505 kills in less than a hundred days, a lesson learned by the Red Army to its cost. By the Germans invasion of 1941 the Russians were prepared: when the war ended, in addition to men such as Vasiliy Zaytsev, a Stalingrad hero with 242 accredited kills, the USSR had trained more than 2000 women as snipers. After 1945, the sniper's reputation declined again. However, the Vietnam War, seemingly unending Middle Eastern conflict, internal strife in Sri Lanka, and ever-present urban threats have given new impetus not only to sniping but also to the development of new and more effective weaponry.

The History Of Sniping And Sharpshooting John Plaster 2008-01-01
Thirty-six months in combat. Twenty-four years as a sniping instructor. Twenty years of exhaustive research, including decades spent seeking out hundreds of historic volumes long out of print, test-firing historic firearms, walking Revolutionary and Civil War battlefields with a laser rangefinder, and visiting military museums in the United States and Europe. Only Major John Plaster, author of the highly acclaimed *The Ultimate Sniper*, has the background and knowledge to bring you this authoritative history of sniping and sharpshooting – the first such book from a combat rifleman's unique perspective. In *The History of Sniping and Sharpshooting*, John Plaster has assembled the most comprehensive combat history ever published on the subject. It begins

in the 15th century, with the first use of "precision" musket fire in Europe and continues into the 21st century with the significant role sniping is playing the Iraq and Afghanistan and the global War on Terror. Detailing major engagements and minor skirmishes over five centuries of warfare, Plaster has unearthed hundreds of incidents where calculated precision rifle fire has changed the course of battles – and, sometimes, history. He fittingly addresses well-known sharpshooters and snipers – Hiram Berdan, Vasili Zaitsev, Carlos Hathcock – but also pays tribute to forgotten riflemen such as John Burns, Benjamin Forsyth and Arthur Wermuth, to name but a few. He also explains how the evolution of firearms and optical technology has intertwined with sniping on the battlefield and how it has influenced tactics, organizations, and capabilities – a subject that has never before been address adequately.

Survival Guns Mel Tappan 2009-11-01 When he wrote *Survival Guns* in 1979, Mel Tappan demonstrated that having the right weapons for securing food and providing personal defense is the key to sustaining life on an independent basis, whether or not a catastrophe occurs. This is even more true today. *Survival Guns* became the standard in its own time and went through several printings. When it finally went out of print, it graduated from a classic to a sought-after collector's item, because the principles and advice in this well-reasoned volume are sound and perennially valuable. Some new guns and some new calibers have become available since this book was first published, but its principles, advice, and value remain unchanged. Having more choices only increases the value of advice on how to choose what is best for you. As used copies of this book became harder and harder to find, Paladin received numerous requests to bring Tappan's classic

back into print. We are pleased to make the most well-known survival firearms book ever published available once more to a new generation of concerned citizens facing the same threats Tappan chronicled during his lifetime. *Survival Guns* remains the definitive book for anyone interested in the practical use of firearms and related weapons for defense, food gathering, and predator and pest control under conditions of long-term, self-sufficient living.
