Catalogo della mostra presso il Museo Nazionale Etrusco di Villa Giulia a Roma dal 29 aprile al 29 giugno. Una scoperta eccezionale avvenuta a Vulci nel 2013, la Tomba delle Mani d'argento, è l'occasione per presentare al pubblico gli straordinari materiali che testimoniano la ricchezza dei principes etruschi del VII secolo a.C. e le loro relazioni con le genti del Mediterraneo orientale. Oggetti esotici, gioielli, abiti cerimoniali e idoli accompagnano nel lungo viaggio verso l'Aldilà gli esponenti di spicco dell'opulenta aristocrazia vulcente come simbolo di status e anelito all'immortalità. **Figures of Speech** Gloria Ferrari 2002-01-15 Over the past two hundred years, thousands of ancient Greek vases have been unearthed. Yet these artifacts remain a challenge: what did the images depicted on these vases actually mean to ancient Greek viewers? In this long-awaited book, Gloria Ferrari uses Athenian vases, literary evidence, and other works of art from the Archaic and Classical periods (520-400 B.C.) to investigate what these items can tell us about the ancient Greeks—specifically, their notions of gender. Ferrari begins by developing a theoretical perspective on visual representation, arguing that artistic images give us access to how their subjects were imagined rather than to the way they really were. For instance, Ferrari's examinations of the many representations of women

working wool reveal that these images constitute powerful metaphors—metaphors, she argues, which both reflect and construct Greek conceptions of the ideal woman and her ideal behavior. From this perspective, Ferrari studies a number of icons representing blameless femininity and ideal masculinity to reevaluate the rites of passage by which girls are made ready for marriage and boys become men.

Representations of the nude male body in Archaic statues known as *kouroi*, for example, symbolize manhood itself and shed new light on the much-discussed institution of *paiderastia*. And, in Ferrari's hands, imagery equating maidens with arable land and buried treasure provides a fresh view of Greek ideas of matrimony. Innovative, thought-provoking, and insightful throughout, *Figures of Speech* is a powerful demonstration of how the study of visual images as well as texts can reshape our understanding of ancient Greek culture.

*Castellani and Italian Archaeological Jewelry* Susan Weber Soros 2004-01-01  
During the nineteenth century in Rome, three generations of the Castellani family created what they called "Italian archaeological jewelry," which was inspired by the precious Etruscan, Roman, Greek, and Byzantine antiquities being excavated at the time. The Castellani jewelry consisted of finely wrought gold that was often combined with delicate and colorful mosaics, carved gemstones, or enamel. This magnificent book is the first to display and discuss the jewelry and the family behind it. International scholars discuss the life and work of the Castellani, revealing the wide-ranging aspects of the family's artistic and cultural activities. They describe the making and marketing of the jewelry, the

survey collection of all periods of Italian jewelry on display in the Castellani's palatial store, and the Castellani's activities in the trade of antiquities, as they sponsored excavations, and restored, dealt, and exhibited antiques. They also recount the family's involvement in the cultural and political life of their city and country.
