Understanding Political Science Statistics Peter Galderisi 2015-03-24 In politics, you begin by asking theoretically interesting questions. Sometimes statistics can help answer those questions. When it comes to applied statistics, students shouldn't just learn a vast array of formula—they need to learn the basic concepts of statistics as solutions to particular problems. Peter Galderisi demonstrates that statistics are a summary of how to answer the problem: learn the math but only after learning the concepts and methodological considerations that give it context. With this as a starting point, Understanding Political Science Statistics asks students to consider how to address a research problem conceptually before being led to the appropriate formula. Throughout, Galderisi looks at problems through a lens of "observations and expectations," which can be applied to myriad statistical techniques, both descriptive and inferential. This approach links the answers researchers get from their individual data analysis to the research designs and questions from which these analyses are derived. By emphasizing the underlying logic of statistical analysis for greater understanding and drawing on applications and examples from political science (including law), the book illustrates how students can apply statistical concepts and techniques in their own research, in future coursework, and simply as an informed consumer of numbers in public discourse. The following features help students master the material: Legal and Methodological sidebars highlight key concepts and provide applied examples on law, politics, and methodology; End-of-chapter exercises allow students to test their mastery of the basic concepts and techniques along the way; A Sample Solutions Guide provides worked-out answers for odd-numbered exercises, with all answers available in the Instructor's Manual; Key Terms are helpfully called out in both Marginal Definitions and a Glossary; A Companion Website (www.routledge.com/cw/galderisi) with further resources for both students and instructors; A diverse array of data sets include subsets of the ANES and Eurobarometer surveys; CCES; US Congressional district data; and a cross-national dataset with political, economic, and demographic variables; and Companion guides to SPSS and Stata walk students through the procedures for analysis and provide exercises that go hand-in-hand with online data sets.

Researching Music Censorship Helmi Järviluoma 2017-06-23 Freedom of expression and its direct counterpart, censorship and silencing, are increasingly gaining attention in the world of art and culture. Through the growth of social media and its worldwide distribution, arts and cultural products are shared, and the increased visibility and audibility of culture is highlighted through iconic and pivotal clashes, such as the fatwa on The Satanic Verses in 1989, the recurring bans on the music of Wagner, the alleged censorship of playlists following 9/11, and the cartoon crisis in 2006. This volume takes the discussion directly to the field of music studies in a broad frame and insists on examining music censorship in a global perspective. The book addresses the important and increasingly relevant issue of scholarship on music censorship and thus contributes to a detailed understanding of the phenomenon. Often, words and semantic meaning are held to be determining to the restrictions on musicians and singers, but as this collection documents, the reasons for censorship might not always be found in verbal messages. Rather, the positioning of a more broad understanding of why and how music can convey meaning and accordingly trigger censorship and bans is at the heart of this work. The complexity of music censorship includes historical, structural as well as emotional 'listeenings' and interpretations of sound. The topic, accordingly, is political, as well as scholarly urgent.

Evidence Based Treatments for Trauma-Related Psychological Disorders Ulrich Schnyder 2015-01-30 This book offers an evidence based guide for clinical psychologists, psychiatrists, psychotherapists and other clinicians working with trauma survivors in various settings. It provides easily digestible, up-to-date information on the basic principles of traumatic stress research and practice, including psychological and sociological theories as well as epidemiological, psychopathological, and neurobiological findings. However, as therapists are primarily interested in how to best treat their traumatized patients, the core focus of the book is on evidence based psychological treatments for trauma-related mental disorders. Importantly, the full range of trauma and stress related disorders is covered, including Acute Stress Reaction, Complex PTSD and Prolonged Grief Disorder, reflecting important anticipated developments in diagnostic classification. Each of the treatment chapters begins with a short summary of the theoretical underpinnings of the approach, presents a case illustrating the treatment protocol, addresses special challenges typically encountered in implementing this treatment, and ends with an overview of related outcomes and other research findings. Additional chapters are devoted to the treatment of comorbidities, special populations and special treatment modalities and to pharmacological treatments for trauma-related disorders. The book concludes by addressing the fundamental question of how to treat whom, and when.

On Guilt, Responsibility, and Punishment Alf Ross 1975-01-01 Selected essays originally published as a book in Danish in 1970. Three had been published before then in English, but the others are new. All deal with concepts common to law and morality. "They function in the same way in legal and moral discourse: guilt determines responsibility, and responsibility punishment. But the conditions under which a person incurs guilt differ according to whether the guilt is legal or moral, as do also the manner in which the responsibility takes effect and the penal reaction itself." Cf. Preface, page v.

Law of the Sea Hugo Caminos 2017-07-05 This series brings together the most significant published journal articles in international law as determined by the editors of each volume in the series. The proliferation of law, specialist journals, the increase in international materials and the use of the internet has meant that it is increasingly difficult for students and legal scholars to have access to all the relevant articles. Many valuable older articles are unable to be obtained readily. In addition each volume contains an informative introduction which provides an overview of the subject matter and justification of why the articles were collected. This series contains collections of articles in a manner that is of use for both teaching and research.

The Nature and Authority of Precedent Neil Duxbury 2008 Neil Duxbury examines how precedents constrain legal decision-makers and how legal decision-makers relax and avoid those constraints. There is no single principle or theory which explains the authority of precedent but rather a number of arguments which raise rebuttable presumptions in favour of precedent-following. This book examines the force and the limitations of these arguments and shows that although the principal requirement of the doctrine of precedent is that courts respect earlier judicial decisions on materially identical facts, the doctrine also requires courts to depart from such decisions when following them would perpetuate legal error or injustice. Not only do judicial precedents not 'bind' judges in the classical-positivist sense, but, were they to do so, they would be ill suited to common-law decision-making. Combining historical inquiry and philosophical analysis, this book will assist anyone seeking to understand how precedent operates as a common-law doctrine.

Hans Christian Andersen and Community Anne Klara Bom 2020-01-07 The theme of community has perhaps never been of a more vital significance than in our present day and age. The process we refer to as modernity has been synonymous with the gradual fragmentation and disintegration of traditional communities on various levels of our societies. Today, we might be facing the culmination of this process. The spectres of nationalism are undermining various national and international communities. Inequality is on the rise. If people unite it is too often in the mistrust and sometimes hatred of other people. Hans Christian Andersen lived at a time when this process was at its early stages, and he was acutely aware of its potential perils. Alongside the transformations of traditional communities, other communities seem to appear. A recurring element in these culturally specific communities is literature, and Hans Christian Andersen is a key figure here, as his literary and cultural legacy has a magnetic effect on people around the globe. A vivid example of this effect was the conference Hans Christian Andersen and Community. The conference was held at the University of Southern Denmark in 2017 to celebrate the 150th anniversary of Hans Christian Andersen's status as honorary citizen in Odense. This book presents a selection of 19 contributions to the conference. In various ways, each chapter activates the concept of community in relation to Andersen as an author and as a citizen of the world he lived in as well as the cultural icon which he has become.

Iqbal Farooq and the Guiding Star Manu Sareen 2013-12-06 This is a very different Christmas story. Meet Iqbal Farooq and his family - for the first time in English: It is December 24th and Iqbal's dad just got a great idea: "Let's have the biggest and most spectacular Christmas tree in the whole building. No, in the whole neighbourhood," Dad shouted. But since his idea involves Iqbal's crazy uncle Rafiq, it probably means trouble. Manu Sareen is the author behind the politically incorrect children's books about Iqbal and his immigrant family's life in multicultural Nørrebro in Copenhagen, Denmark. Manu Sareen is also a well known politician and has served as Danish national congress member. This book is published in fixed layout.

The Common Place of Law Patricia Ewick 2014-12-10 Why do some people not hesitate to call the police to quiet a barking dog in the middle of the night, while others

accept the pain and losses associated with defective products, unsuccessful surgery, and discrimination? Patricia Ewick and Susan Silbey collected accounts of the law from more than four hundred people of diverse backgrounds in order to explore the different ways that people use and experience it. Their fascinating and original study identifies three common narratives of law that are captured in the stories people tell. One narrative is based on an idea of the law as magisterial and remote. Another views the law as a game with rules that can be manipulated to one's advantage. A third narrative describes the law as an arbitrary power that is actively resisted. Drawing on these extensive case studies, Ewick and Silbey present individual experiences interwoven with an analysis that charts a coherent and compelling theory of legality. A groundbreaking study of law and narrative, *The Common Place of Law* depicts the institution as it is lived: strange and familiar, imperfect and ordinary, and at the center of daily life.

The Last Execution Jesper Wung-Sung 2016-03-22 Called "brilliantly devastating" in a starred review from Kirkus Reviews, this award-winning, mesmerizing novel, based on the chilling true story of the last execution in Denmark's history, asks a question that plagues a small Danish town: does a fifteen-year-old boy deserve to be put to death? On February 22, 1853, a fifteen-year-old Niels Nelson is prepared to be executed on Gallows Hill. The master carpenter comes to measure Niels for his coffin. The master baker bakes bread for the spectators. The messenger posts the notice of execution in the town square. The poet prepares his best pen to record the events as they unfold. A fly, Niels's only companion in the cell, buzzes. A dog hovers by his young master's window. A young girl hovers too, pitying the boy. The executioner sharpens his blade. This remarkable, wrenching story is told with the alternating perspectives of eleven different bystanders—one per hour—as the clock ticks ever closer to the moment when the boy must face his fate. Niels Nielson, a young peasant, was sentenced to death by beheading on the dubious charges of arson and murder. Does he have the right to live despite what he is accused of? That is the question the townsfolk ask as the countdown begins. With strong social conscience, piercing intellect, and masterful storytelling, Jesper Wung-Sung explores the age-old question: who determines who has the right to live or die?

Social Inequalities and Cancer Manolis editor Kogevinas 1997 In both industrialized and less developed societies, cancer incidence and survival are related to socioeconomic factors. This fascinating volume, the first to examine the magnitude of these socioeconomic differences in relation to cancer, provides vital information for all those interested in public health. Cancer incidence and survival are related to socioeconomic status in both industrialized and less developed countries. These differences can be explained, in part, by known risk factors, particularly tobacco smoke, occupational exposures, reproductive behaviour, diet and biological agents. T.

Criminal Jurisdiction Thomas Elholm 2014-06-30 Jurisdiction in criminal matters is one of the classical central issues concerning criminal justice. Due to globalization, it seems increasingly relevant for legislators, prosecutors, and judges all over. This book contains a brief overview of the criminal jurisdiction rules in the five Nordic countries: Denmark, Finland, Iceland, Norway, and Sweden. The structure of the book makes it easy to analyze and compare the rules cross-border. This is relevant due to the close historical and cultural relationship of the five countries, and due to decades of practical cooperation in criminal matters between the countries. The trend to extend domestic jurisdiction is also seen outside the Nordic countries, which makes the book relevant for readers outside the region. The End of Irish History? Colin Coulter 2003-09-20 Ireland appears to be in the throes of a remarkable process of social change. The purpose of this book is to systematically scrutinize the interpretations and prescriptions that inform the deceptively simple metaphor of the "Celtic Tiger." The standpoint of the book is that a more critical approach to the course of development being followed by the Republic is urgently required. The essays collected here set out to expose the fallacies that drive the fashionable rhetoric of Tigerhood. Four of these fallacies--that Ireland has cast off the chains of economic dependency, that everyone is benefiting from the economic recovery, that personal freedom and liberty are at an unprecedented level for all citizens, and that Ireland is also experiencing a period of strong cultural renaissance--are vigorously challenged.

Bullied and persecuted at school, he retreats into the eccentric world of his family's history - but he can't escape the fact that, for him, his parents, and his paternal grandparents, the war is still being fought.
